

Bulk Recovery Solutions

GENERAL SOLID WASTE

Bulk Recovery Solutions Pty Ltd (BRS) is a Licensed EPA waste facility based at Ingleburn, and only minutes from the Hume Hwy.

BRS is one of New South Wales' leading operations for the treatment of solid and liquid waste.

Our resource recovery facility used the best innovative technology designed inhouse by our team of Engineers.

This allows us to treat all wastes economically and efficiently, with our goal to recover and recycle waste rather than send to landfill.

Our team of dedicated staff strive to make the treatment of waste safe, simple and effective.

Our EPA licensing allows us to accept, process, recycle or dispose of a wide range of industrial solid waste and contaminated soils.

Our premises are functional for all weather access to ensure safe unloading and efficient turnaround times.

OUR GOAL IS TO RECEIVE, TREAT AND RECYCLE

Products we are licensed to accept and/or process on-site include:

GENERAL SOLID WASTES

We are licensed to take General Solid Waste on the provision that it meets our acceptance criteria.

CONCRETE

BRS accepts a wide range of Concrete Products, ranging from concrete batch plants, agitator trucks, concrete, asphalt and brick.

BUILDING AND DEMOLITION WASTE

BRS accepts a wide range of demolition and building waste, such as concrete, bricks, tiles and terracotta. We do not accept Asbestos, Timber and Metal Products.

SOILS / CT1 (CLASSIFICATION)

BRS is licensed to accept soils and sands that meet CT1 Classification and threshold. Please contact BRS with Classification Reports to ensure that it meets our criteria.

Please note, that BRS does not accept Acid Sulphate Soil (ASS), or Potential Sulphate Soils (PASS).

SOILS / CT2 (CLASSIFICATION)

BRS is not licensed to process CT2 soils onsite, however, under our current licence we can hold onsite ready to be redistributed to another EPA Licensed facility for processing.

Disclaimer: All waste is subject to Classification Reports prior to receiving onsite.
